Safety instructions

General instructions

Thank you for purchasing one of our safe and fun products! With this manual we want to describe how to use Airtracks. Please make sure to read through the instructions carefully before using your Airtrack. Should anything be unclear, do not hesitate to contact our customer support! We hope you enjoy your new equipment.

- Always store and transport the Airtrack in its carrying bag. Do not use the Airtrack if it is damaged or leaking air.
- Choose an appropriate area to set up the Airtrack. Ensure that there is nothing sharp underneath the Airtrack (such as rocks, gravel, etc.) when setting it up to avoid damaging the Airtrack. If you use the Airtrack outside, set it on level and soft ground, preferably on top of a protective tarp or fabric.
- To clean the Airtrack surface, wipe it with lukewarm soapy water. Avoid strong cleaning solutions. Before rolling up the Airtrack for storage, ensure that the Airtrack is clean and dry.
- The recommended temperature for Airtrack use is 10-30°C / 50-86°F and for storage it is at least +5°C / 41°F (not recommended to be stored in direct sunlight).

Safety instructions

- Your safety is most important to us. So please make sure you read the user manual before installing and using the product. If you are unsure about any information in this manual, please contact the dealer from whom you purchased the device.
- **DO NOT** use the product if you have not yet read the instruction manual.
- Make sure you have read the user manual thoroughly and understood the contents before you begin the installation.
- The instructions are in the interest of your safety.

Safety instructions

Safety instructions

- USE YOUR AIRTRACK ONLY FOR ITS INTENDED PURPOSE.
- Never walk on your Airtrack with shoes as they may damage the surface.
- Never place your Airtrack underneath objects such as trees or power lines.
- Keep all sharp or pointed objects away from your AirTrack.
- Never jump or land closer than 20 cm from the valve.
- Make sure your Airtrack is inflated with enough pressure to avoid injury.
- The area where your Airtrack is set up must be clean, dry, level and free of objects.
- Always set up your Airtrack where you intend to use it. If you change the set-up location, do not drag your Airtrack across the floor, but carry it by the handles.
- Do not use your Airtrack in the rain, the surface becomes slippery and there is a risk of injury.
- Never pack, store or transport your Airtrack when wet.
- Your Airtrack can be cleaned with water and a mild detergent. Do not use industrial cleaning products.
- Never use a damaged Airtrack.
- Do not leave your Airtrack in the blazing sun or in a hot environment as this may cause cracking and overpressurisation.

2

Operating instruction

Inflate/Deflate User Instructions

Inflating the Airtrack: Remove the Airtrack from the carrying case and roll out fully so that the valves are visible.

Open valve cover (1). Ensure that the valve button is in the up-position (2). Place the head of the pump tube into the valve and twist to the right so that the pump and valve connect tightly (3).

Recommended pressure for Airtrack is 3-4 PSI. The bounciness of the Airtracks depends on much pressure you put in it. Our recommended pressure level is 3-4 PSI, but the most optimal pressure depends on the users' preferences.

When inflate to suitable pressure, remove the head of the pump tube by twisting to the left. Put the valve cover back in place to avoid air leaking from the Airtrack.

2

Operating instruction

Inflate/Deflate User Instructions

Deflating the Airtrack: Push the valve button into the down-position and the valve will open (2).

If air leaks around the valve, follow these steps:

1. Remove the valve key from its packing case.
2. Open the valve cover and place the valve key on the valve.
3. Turn the valve key clockwise until there is no space between the valve and the Airtrack. Do not turn the key counterclockwise as this will cause the valve to loosen, leak air, and eventually detach from the Airtrack.
4. Close the vent and check to see if the leak stopped.
